Description

Students will be introduced to Packet Tracer to setup and configure a SOHO (small office home office) network. In addition, students will be introduced to the configuration of networking devices such as routers, switches, and end devices. Packet Tracer is a virtual networking software that allows students setup, configure and troubleshoot network domains

Outcomes

- Understand network fundamental concepts
- Identify networking devices
- Build and configure a small network

Alignment

The standards and guidelines this learning object is mapped to

- GenCyber-Principles (2018) - 5: Layering
- GenCyber-Principles (2018) - 6: Least Privilege
- GenCyber-Principles (2018) - 7: Domain Separation
